

Artwork Requirements

When supplying artwork, please try adhering to the following guidelines:

Preferred File Type:

PDF.

Please supply pdf's wherever possible. SEPARATE pdf's are required if a die line is needed; DO NOT place the die line within the print file.

Corel13,Eps,Ai,Tiff & High Res Jpeg

Scans:

Scans should be 600dpi for best image quality.

Finished artworks should be 200dpi.

Fonts:

Please convert all fonts to paths/curves.

Alternatively, supply the fonts with the art file.

Colour Matching:

A colour print or colour swatch should be supplied to allow us to accurately match colour. Pantone references are also accepted.

Where time does not allow us to submit a proof, we will do our best to meet your requirements. Responsibility in this instance rests with the client.

Please note:

We reserve the right to put a job on hold when documents have been incorrectly saved, fonts not supplied, or where the job appears to be commercially unacceptable.

Any questions or queries, please don't hesitate to contact us.
